PROFESSIONAL SUMMARY

Computer Science student developing backend development skills with JavaScript, Node.js, and Express.js. Interested in REST API development, authentication, authorization, and writing clean, maintainable code, and committed to learning through practical projects. Seeking a Backend Developer Internship to apply and strengthen these skills in a professional team environment.

EDUCATION

BS Computer Science May 2026 – Present
Virtual University of Pakistan | Currently in Second Semester

Intermediate 2022 – 2024
Government Frontier College for Women, Peshawar

Matriculation 2020 – 2022
Al Mashriq Public High School, Peshawar

TECHNICAL SKILLS

Programming Language: JavaScript
Backend Runtime: Node.js
Framework: Express.js
Backend Concepts: REST APIs, CRUD operations, HTTP methods, JSON, middleware, request validation, error handling
Security Concepts: Authentication and authorization
Developer Tools: Git, GitHub
Currently Learning: NestJS

PRACTICE PROJECTS

Self-directed learning projects, not professional experience. Features are planned scope; none are claimed as completed.

User Authentication API

Planned scope:

- User registration and login endpoints.
- Authentication and authorization concepts applied to the API.
- Protected routes, middleware, and input validation.

Blog REST API

Planned scope:

- CRUD operations for blog posts.
- Route handling and request validation.
- Authorization for protected operations.

Task Management API

Planned scope:

- Create, read, update, and delete tasks.
- RESTful endpoint design.
- Basic validation and error handling.
